DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5 and 7, drawn to a method of preventing immune coagulation by inhibiting a nucleocapsid. If applicant elects this group, further election of the following inventions is also required:

A) antibody

B) antisense oligonucleotide

Group II, claim(s) 6 and 8-10, drawn to a method of inducing immune coagulation by administering N-protein or gene.

Group III, claim(s) 11-15, drawn to a method of preventing immune coagulation by inhibiting LF-A1. If applicant elects this group, further election of the following inventions is also required:

1) antibody

2) antisense oligonucleotide

Group IV, claim(s) 16 and 18, drawn to inducing immune coagulation by administering LF-A1 protein or gene.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of preventing immune coagulation by administering an antisense nucleic acid, an inhibitor of a nucleocapsid protein in group I is known in the art, see the teachings of Ning et al (J Biol Chem. 1999; 274 (15): 9930-9936). Therefore, the claims lack unity of invention.

Group II is a second method using a different product from group I.

Art Unit: 1648

Group III is drawn to a third method using a product different from groups I or II.

Group IV is drawn to a fourth method using a product different from any of groups I, II, or III.

Inventions A, B, and 1, 2 are drawn to four structurally unrelated products with distinctly different functions.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shanon A. Foley whose telephone number is (703) 308-3983. The examiner can normally be reached on 9:00-5:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Housel can be reached on (703) 308-4027.
